---

### 1. General Conditions of Supply (For all categories of Consumers):

**1.1 Rebate/Surcharge for availing supply at voltage higher/lower than base voltage:** In spite of feasibility/availability to given supply at the specified voltage for the corresponding load as stipulated in clause-3.2 of the JERC for Manipur and Mizoram (Electricity Supply Code) Regulations, 2013 (with up to date amendment.)

- (i) For consumers having contracted load upto 50 kW only, but, the supply is given at higher voltage (HT/EHT level), then a rebate of 5 % would be admissible on the energy and fixed charges applicable to that class of consumer for such period, he/she is so availing the supply at that voltage level.
- (ii) For consumers having contracted load above 50 kW, but the consumer desires to draw supply at a voltage lower than that of base voltage he/she is eligible avail for corresponding load as per clause of supply code mentioned above, the consumer shall be required to pay additionally an extra charge of 10% on the bill amount (Energy charge & Fixed charge) calculated at the applicable voltage category tariff to which he/she should have normally availed.
- (iii) All voltages mentioned above are normally available rated voltages as per clause 3.2 of the JERC for Manipur & Mizoram (Electricity Supply Code) Regulations, 2013, with up to date amendment.

**1.2 Payment:** All payments shall be made by way of Cash/Banker's Cheque/by Demand Draft/through Money Order/E- transfer on line. But in the case of payments to be made in cash (the amount limit will be fixed and notified in advance by the Licensee to his convenience).

**1.3. Validity of Existing Recharge Voucher:** In the case of a consumer with prepaid meter who has purchased voucher prior to the effective date of new tariff, the existing voucher shall be continued till such voucher recharged amount is fully exhausted without levying any extra charge to such consumer. Therefore, Licensee shall cautiously issue recharge voucher(s) in such a way that the voucher's validity period shall not exceed the number of days beyond the effective date of new tariffs coming into force.

**1.4. Due date:** Due date for payment of monthly bill through cheques shall be **three (3) days** in advance from the normal due date for that bill payment. While, in the case of payment through online bank transfer/credit card, it shall be **one (1) day** in advance from the normal due date specified for that bill. The licensee shall ensure that the bill is delivered to the consumer by

hand/post/courier at **least ten (10) days** prior to the payment due date of the bill. (Clause 6.1 & 6.5 of the JERC for Manipur & Mizoram (Electricity Supply Code Regulations, 2013 with latest amendments).

**1.5. Surcharge for late payment of bills:** If payment is not received within the due date, a surcharge @ **two percent (2%)** (simple interest) will be levied on the outstanding principal amount for number of days of delay occurred to each thirty (30) days successive period or part thereof or until such time the due amount is paid in full.

**1.6. Single Point Delivery:** This tariff is based on the supply being given through a single point of delivery and metering at one voltage. Supply availed at other points at other voltage level shall be metered separately and billed accordingly and it shall be treated as a separate connection.

**1.7. Voltage and frequency:** All voltages and frequency shall be as per clause 3.1 and 3.2 of the JERC for Manipur & Mizoram (Electricity Supply Code) Regulations, 2013 (with latest amendments).

**1.8. Power Factor Incentive / Surcharge: -**

- a) If the average monthly power factor of the HT consumer/LT 3-Phase consumer /LT Industrial consumer increases above 95%, he shall be paid **an incentive** at the following rate:

Type of Event	Incentive
For each one percent increase by which his average monthly power factor is above 95%, up to unity power factor.	One percent (1%) of the total amount of the bill under the head “ <b>energy charge</b> ”

- b) If the average monthly power factor of the HT consumer/LT 3- phase consumer /LT industrial consumer falls below 90%, he shall pay a **surcharge in addition** to his normal tariff, at the following rate:

Type of Event	Surcharge
For each one percent by which his average monthly power factor falls below 90% up to 85%	One percent (1%) of the total amount of the bill under the head ‘energy charge’

- c) If average monthly power factor of the HT consumer/LT 3- phase consumer /LT industrial consumer falls below 85%, he shall pay a **surcharge in addition** to his normal tariff at the following rate:

Type of Event	Surcharge
For each one percent by which his average monthly power factor falls below 85%.	Two percent (2%) of the total amount of the bill under the head 'energy charge'

- d) If the average monthly power factor of the HT consumer/LT 3- phase consumer /LT industrial consumer falls below 70%, then the utility shall have the right to disconnect supply to consumer's installation after serving a notice of fifteen (15) days. Supply may be restored only after steps are taken to improve the power factor to the satisfaction of the Utility. This is, however, without prejudice to the levy of surcharge for low power factor in the event of supply not being disconnected.
- e) For this purpose, the “average monthly power factor” is defined as the ratio of total ‘Kilo Watt hours’ to the total ‘Kilo Volt Ampere hours’ recorded during the month. This ratio will be rounded off to two figures after decimal. Figure 5 or above, in the third place after decimal being rounded off to the next higher figure in the second place after decimal.
- f) Notwithstanding the above, if the average monthly power factor of a new consumer is found to be less than 90% at any time during the first 6 (six) months from the date of connection, and if he maintains the average monthly power factor in subsequent three months at level not less than 90%, then the surcharge billed on account of low power factor during the staid period, shall be withdrawn and credited in the next month's bill.

**1.9. Transformation loss:** The consumers getting their supply at HT and metered on the LT side shall be charged transformation loss in kWh as per clause 5.7 JERC for Manipur and Mizoram (Electricity Supply Code) Regulations, 2013 (**with up to date amendment**). The same is reproduced for convenience sake:

- (1) The average losses in the transformer shall be calculated as follows and added to the energy consumption indicated by the meter:

$$\text{Average transformer loss} = \frac{730 \times 1.0 \times C}{100} \text{ kVAh per month}$$

where C = KVA rating of the transformer.

For conversion of kVAh to kWh or vice versa, the applicable latest power factor as per JERC (M&M) (Electricity Supply Code) Regulations, 2013 with latest amendment shall be adopted.

where C = KVA rating of the transformer. For conversion of kVAh to kWh or vice versa, the applicable latest power factor as per JERC (M&M) (Electricity Supply Code) Regulations, 2013 with latest amendment, shall be adopted.

- (2) The transformer loss arrived at by the above formula shall be added to the energy consumption, even when the recorded energy consumption is **nil**.
- (3) 1% of the transformer capacity for transformer above 63 KVA will be added to the recorded maximum demand on the Low-Tension side to arrive at the equivalent High-Tension demand.

**1.10. Rounding of Contracted Load/billing demand:** For the purpose of calculation of fixed/demand charge in the monthly billing, the contracted load/billing demand shall be taken on actual basis as recorded by DISCOM office. In case, if the contracted load/billing demand found lesser than 0.5 kW or kVA shall be rounded up as 0.5 kW/kVA as the case may be. While all contracted load/billing demand above 0.5 kW/kVA shall be taken as per actual details recorded in the consumer historical profile data maintained by the Licensee. **The Licensee should update Contracted load/Billing demand as per the provisions of clause-4.108 of JERC for Manipur and Mizoram (Electricity Supply Code) Regulations, 2013 (with upto date amendment).**

**1.11. Mixed Load:-**Any part of the connection given for one specific purpose under defined category, it shall not be utilized for any different purpose(s) other than for which the service released, involving higher rate of charge in the tariff. A separate connection shall have to be taken invariably for such loads/purpose under appropriate category, failing which the entire consumption (i.e., existing category consumption and additional consumption used for different purpose) shall be billed in that corresponding category at higher applicable tariff for which any part of that service connection is utilised.

**1.12. Rounding of Rupees:** Each components of bill, such as energy charge, fixed/demand charge, meter rent,

surcharge, rebate of any kind, etc, including interest, involving fraction of a rupee should be individually round off to nearest rupee (fraction of 50 paise and above to be round off to the next higher rupee and fraction less than 50 paise has to be ignored). In case of non-availability/scarcity of small change of rupees less the Rs.10/- then consumer may be allowed to tender next higher amount divisible by 10. Such over tendered amount shall be carried to next bill as credit and shall not earn interest whatsoever.
